

The Fourth Annual
ND HPSTV Graduate Conference
March 31st – April 1st, 2023

Keynote: Andrew Davison | University of Cambridge
HPS and Science-Engaged Theology: Past and Future

The Starbridge Associate Professor in Theology and Natural Sciences
Author of *Astrobiology and Christine Doctrine* (forthcoming)

April 1st, 10 – 11AM

105 Jordan Hall

Despite the rhetoric of a conflict between science and religion, an interdisciplinary exchange between theologians and scientists has continued down the centuries, often in a deeply philosophical register. Indeed, until the past couple of centuries, many prominent scientists often also wrote on theological matters. Beginning with an appreciation of HPS from my perspective as an historical and philosophical theologian, this paper will first assess exchanges between theology and science over recent decades. I will then consider some of the characteristic features of work between theology and science at the present time, taking in both research and education.

Organized by the History and Philosophy of Science Program, University of Notre Dame
